

# DUCTING ANGLE LUW F

Ducting Angle for a direct installation to the flange of rectangular ventilation ducts. Due to this external connection it's not necessary to penetrate the duct, therefore flow losses do not occur. In addition there are no leakages and flow noises. No disturbing screw tips interfere with cleaning operations.

The Ductings Angles LUW F exceed the demands of VDI Standard 6022 (Hygiene requirements for ductings)

Type LUW SF is suitable for soundproof duct installations according to DIN 4109.

The slot allows adjustment facilities to compensate drill hole differences and construction tolerances.
