HOLDING BRACKET HK 27

APPLICATION

Safety element for channels to be used instead of simple washers. The Holding Bracket prevents the edges along the opening of the channels from bending, and ensures optimum load distribution. When loads are imposed along the channels, B 27 Holding Brackets provide additional safety due to embossed teeth, which bite into the channel.

Suitable for channels type 27.

TECHNICAL DATA

Material: Malleable iron, electro-galvanised.

Hole diam.: 11 mm.
